Date of birth / 18 december 2000

Place of birth / Amsterdam

Telephone / 0031 (0) 6 12 395 450

Email / lot@bloc.nl

Web / www.bloc.nl

Lot van Egdom (2000) studied Built Environment – Urban Design at Breda University of Applied Sciences (BUas). During her studies, she developed a particular interest in social issues within the urban environment. Questions such as *“Why does a place feel comfortable?”*, *“How can people feel connected to their surroundings?”*, and *“What makes a city inclusive and accessible for everyone?”* form the core of her work. This fascination was clearly reflected in her graduation research, in which she placed the voice of the creative community in the Netherlands at the center and explored how cities can better support these groups.

Lot combines her work as Urban Designer at BLOC with her Master’s in Urbanism at TU Delft. This combination enables her to apply the theoretical knowledge she gains in the classroom directly to real-world practice. At BLOC, she focuses on visually translating complex urban challenges, using her creative skills and structured approach to make information clear and accessible.

Lot’s curiosity about social issues, combined with her creative approach and strong visual skills, makes her a valuable addition to the team. At BLOC, she applies her knowledge and passion to help make cities more accessible and inclusive, while continuing to grow and develop herself.

Professional track record

2025 – Now	Urban Designer BLOC Visualizing information with the aim of making complex content accessible and visually appealing.
2024 – Now	Freelancer/Owner Litttie Providing graphic design and illustrations.
2024	Graduation Internship Municipality of Breda Research and design of creative workspaces in Breda, with the goal of giving creatives a voice and a place in the city. The focus was on the value of these spaces for the city and the role of self-initiative in their emergence and preservation.
